DETAILED ACTION

Election/Restrictions

1. Claims 1, 9, 10, 11, 24-32 are generic to a plurality of disclosed patentably distinct species comprising an organometallic complex. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species. Applicant should indicate a single species of the complex by selecting one of the ligands represented by the formulae shown on page 6 of the specification and one of the five metals recited in claim 1. Applicant should further indicate an ultimate species representative of the elected species for search purposes.
2. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
